AURA

Beauty in Precision
Precision in Beauty

The **Aura 3D Imaging System** captures a photo-realistic digital twin of a patient's face and neck with a single capture. It comprehensively analyses facial structures, skin condition, and volumetric changes in an instant.

Provide a shared visual language between practitioners and patients, facilitating communication about treatment options and expected outcomes, enabling better-informed decisions, and creating confidence in the patient's aesthetic journey.

Patients can visualise current conditions, different treatment options and track progress over time with 1:1 before and after digital twins. This leads to greater engagement, stronger commitment, and increased satisfaction.

Aura 3D Imaging System technical specifications

Operating temperature	15°C - 35°C
Storage temperature	5°C - 45°C
IP Rating	IP40
Cameras	Number of cameras: 13 Pixels per cameras: up to 13MP
Light units	Number of light units: 18 Type of light units: LED white, 4000K Polarization: Specular, diffuse
Communication	Bluetooth: 5.2 / BLE WiFi: 802.11ac
Humidity	30% - 60% (operating)
Power supply	Input: 100-240VAC, 2.0A, 50-60Hz Output: 24VDC, 5.0A (120W)
Dimensions	Capture device incl. Handle: 45cm x 30cm x 8cm Trolley: 55cm x 35cm x 23cm
Weight	Capture device + Stand: 3285g Capture device + Adjustable Stand: 4930g Trolley: 3050g

	Minimum system requirements	Recommended system requirements
Mac	**macOS Ventura** MacBook Air / Pro M1 and newer, min. 16 GB unified memory, 256 GB storage	**macOS Sonoma and newer** MacBook Air / Pro M2 and newer, min. 16 GB unified memory or higher, 1TB GB storage
iPad	**iPadOS 16** iPad Pro 12,9" 5th generation, min. 16 GB RAM, 256 GB storage	**iPadOS 17 and newer** iPad Pro 12,9" 6th generation or newer, min. 16 GB RAM, 1TB storage
Windows	**Windows 10** CPU: Intel Core i7 (AMD not supported) 256 GB storage	**Windows 10 and newer** CPU: Intel Core i9 and newer 1 TB storage
